Features

'iLLuma Crystal Rose' improves the skin regeneration ability and function of dermal fibroblasts.

It improves skin tone and texture dulled by dryness and aging, it provides moisture to the inside of the skin and makes the skin naturally radiant and elastic.

/ Precautions

- Avoid facial scrubber and peeling treatment, drinking alcohol, sauna, excessive exercise, and smoking at least for 1 week.
- You may experience temporary pain, bruising, and swelling may appear, and most disappear within a week, but bruising may last for more than a week depending on the individual.
- If you have bruises, apply cold compresses followed by warm compresses.

/ Interval

- The effect is not noticeable immediately after the procedure, but the effect appears gradually after 1 to 2 weeks.
- The first 3 treatments are performed every 2~3 weeks to improve the cell's regenerative ability, after that, an additional treatment is performed every 3 to 6 months to maintain improved skin condition.
